

Finixa cabine protect basic

- Transparant, tacky and washable coating for the protection of spraybooth walls against overspray. Product stays tacky in order to hold on to swirling dust.
- Apply with spray gun (2.5) in two or three coats. The thicker the total coat, the longer it stays activated. Applying another coat after some time will re-activate the product. Remove afterwards with water and sponge.
- Biodegradable.
- Remove or apply another coat when the product is no longer tacky. Only dilute with demineralized water.
- Average consumption per spraybooth: 15L
